Tradition Timeline

Strategy Offerings*

All-Cap Advantage

The All-Cap Advantage Strategy (ACA) is a long-term, fundamentally-driven investment approach whose goals are to generate an attractive risk-adjusted rate of return and to outperform the S&P 500 index over time. The strategy's primary tenet is that a stock represents an ownership interest in a business. Our goal is to identify quality businesses and to buy their stock at a discount to our estimate of its intrinsic worth. ACA portfolios typically hold 40-60 positions. The strategy's long-term orientation results in low portfolio turnover and tax efficiency, making the strategy particularly attractive for taxable investors.

Dividend Value

The Dividend Value investment process is based on the belief that a portfolio of stocks with above-average dividend growth plus an above-average dividend yield should outperform the broader market and experience less downside volatility over a full market cycle. An increased dividend is the most meaningful evidence of management's confidence that a company has reached a higher sustainable level of future cash earnings and operating cash flow. Our research suggests this is a highly reliable indicator that management's optimism is well-founded. As a group, companies with a commitment to pay out a meaningful portion of cash earnings as dividends typically impose more financial discipline on management and are indicative of successful businesses that build shareholder value.

Fixed Income

Tradition's Fixed Income portfolios are actively managed to outperform a benchmark index over the long-term while mitigating risk. We accomplish this through interest rate anticipation, sector allocation and security selection. This strategy is appealing to investors who require higher yields and can accept moderate price volatility. All maturities and sectors are utilized in this strategy as is duration management. Typical duration for a core portfolio ranges between 3 and 7 years depending upon our outlook for the direction of interest rates. Yield curve management is utilized as well. The overall portfolio quality is typically AA-. Fixed income portfolios are constructed to meet specific client needs and mandates.

*Tradition Asset Management also offers balanced portfolios and other fixed income portfolios that can be customized for specific client objectives.

Investment Committee

Name	Role	Education	Tenure
Benjamin C. Halliburton, CFA Managing Director	Chief Investment Officer	Vanderbilt University, BS Duke University (Fuqua), MBA	2000
Diane Sobin, CFA Managing Director	Portfolio Manager	Pace University, BBA	2019

Tradition All-Cap Advantage Strategy

- ❑ Focused portfolios
- ❑ Strategy seeks alpha across the entire capitalization spectrum
 - Bottom-up stock selection from focus research list
 - Capitalization exposure will vary over time depending on valuations
- ❑ Research-driven, contrarian insights
- ❑ Consistent long-term track record of alpha generation
- ❑ Consistently high risk-adjusted returns
- ❑ Achieved a 4-star rating from Morningstar (SMA large blend peer group)

Historical Market Cap Distribution

As of December 31, 2019

Tradition's Investment Philosophy

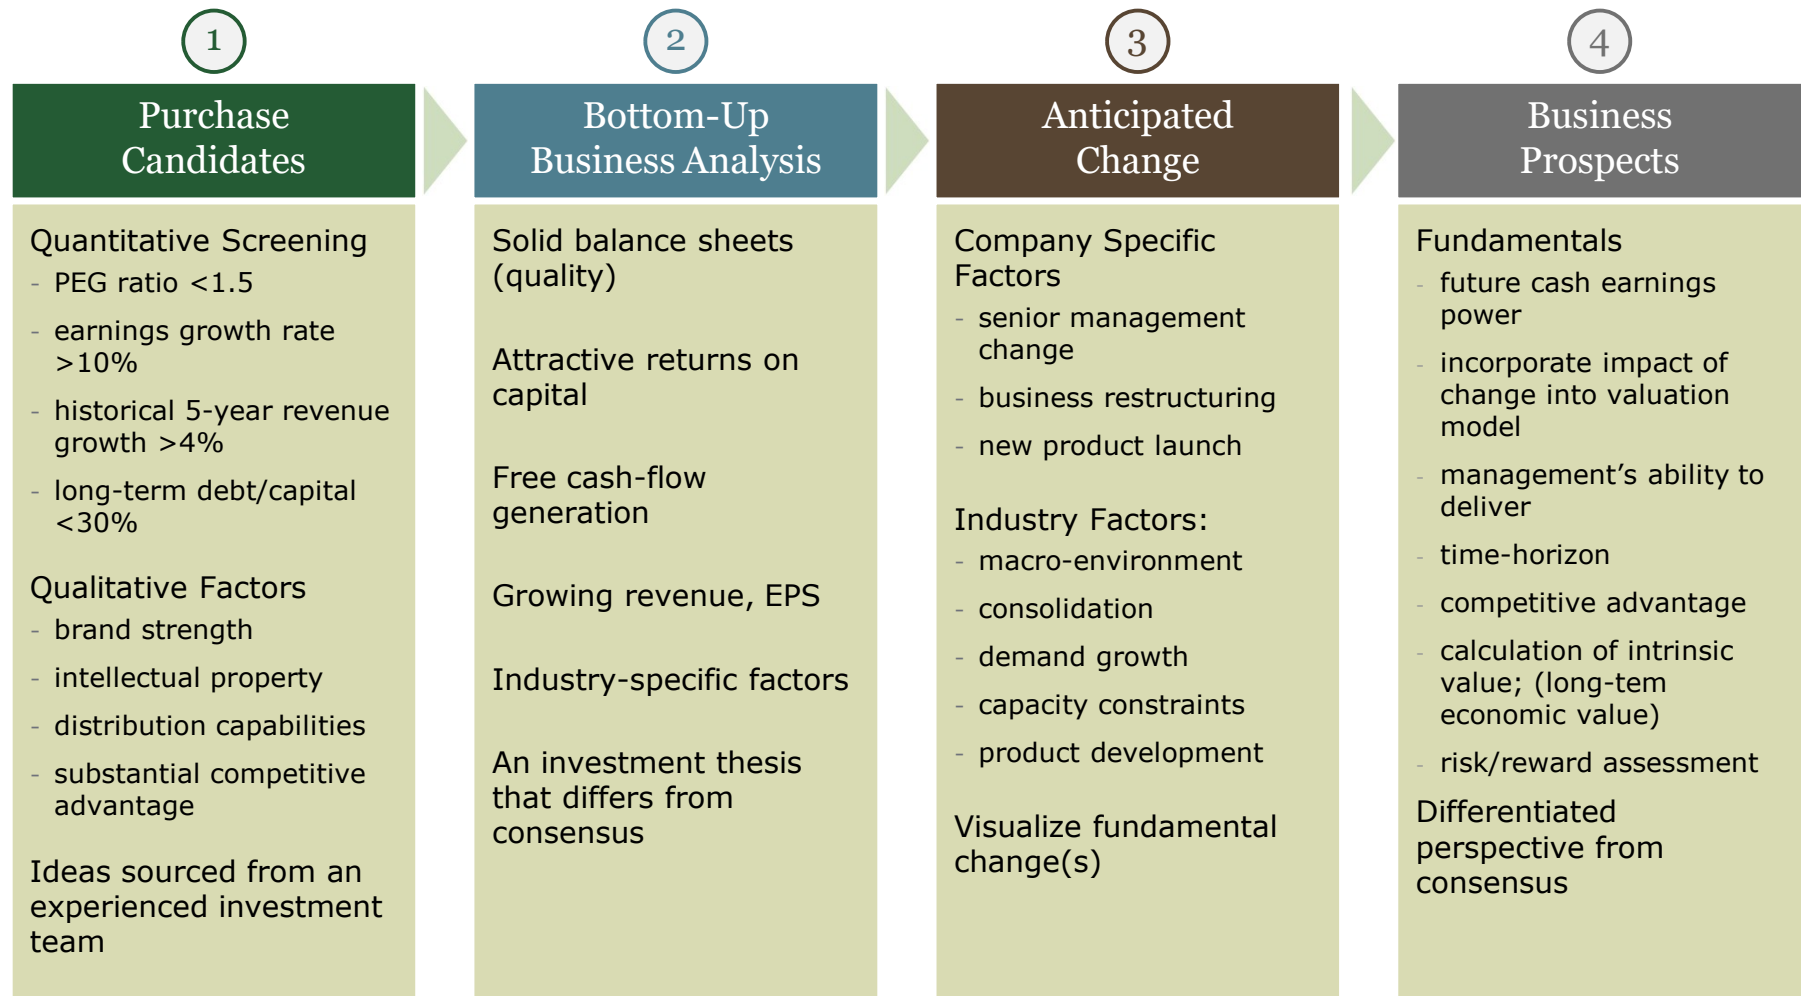

A Well-Disciplined Approach

- ❑ Markets are inefficient in the short term; fear and greed create opportunities for the long-term investor
- ❑ Share prices often fluctuate above/below their intrinsic value (our estimate of a company's economic worth)
- ❑ Fundamental research uncovers opportunities to capitalize and to manage risk
- ❑ We invest only if our proprietary research suggests a stock is undervalued
- ❑ Higher-yielding stock portfolios can provide attractive total returns with downside protection
- ❑ This approach may offer a higher probability of success

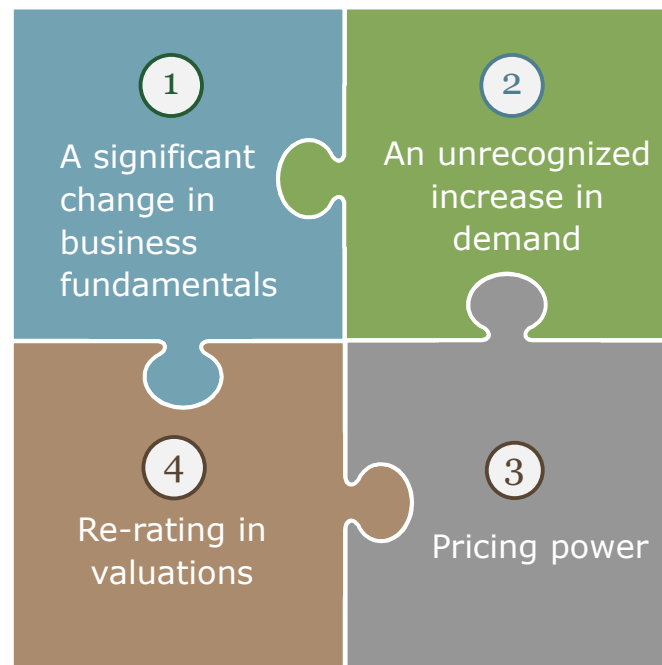

For illustrative purposes only.

N/A: Is not statistically meaningful due to insufficient number of portfolios in the composite for the entire year. Tradition Asset Management, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Tradition Asset Management, LLC has been independently verified for the periods October 17, 2000 through December 31, 2018. A copy of the verification report(s) is/are available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation. Please see continuation of full detailed performance disclosures on next page entitled **All-Cap Advantage Performance Disclosure**. Please read the firm's general disclosures at the end of this presentation or visit our website at www.traditioncm.com.

All-Cap Advantage Performance Disclosure

Tradition Asset Management, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Tradition Asset Management, LLC has been independently verified for the periods October 17, 2000 through December 31, 2018. A copy of the verification report(s) is/are available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation. Past performance is no guarantee of future returns and performance of a specific individual client account may vary substantially from the performance results reflected above. The All-Cap Advantage composite, previously known as Institutional All-Cap and renamed in December 2013, is made up of all equity discretionary equity accounts with the objective of all-cap and with a minimum account level of \$ 200 thousand. Prior to 2013 the minimum was \$500 thousand. Prior to January 1, 2007, the minimum account size for this composite was \$1 MM. For comparison purposes is measured against the S&P 500 index. The S&P 500 index returns are before taxes. The firm maintains a complete list and description of composites, which are available upon request. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. The U.S. Dollar is the currency used to express performance. The S&P 500 (a registered trademark of McGraw-Hill Companies) is an unmanaged index of common stock. Unmanaged indices are for illustrative purposes only. An investor cannot invest directly in an index.

Returns are presented gross and net of management fees. The net performance results reflect time-weighted rates of return, the re-investment of dividends and other account earnings, and are net of applicable account transaction and custodial charges, as well as Tradition's management fee. Gross performance includes all of the aforementioned criteria except for the deduction of Tradition's management fee. Net of fee performance was calculated using actual management fees. In addition to a management fee, some accounts pay an all-inclusive fee based on a percentage of assets under management. Other than brokerage commissions, this fee includes portfolio monitoring, consulting services, and in some cases, custodial services. Tradition's investment management annual base fee schedule is as follows: 1.0% on the first \$5MM, 0.8% over \$5MM. Actual investment advisory fees incurred by clients may vary. Gross returns of wrap accounts are reduced by all transaction costs and other expenses incurred; net returns for all accounts have been reduced by all actual fees incurred. Wrap fee schedules are provided by independent wrap sponsors and are available upon request from the respective wrap sponsor. For purposes of this composite, we've included assets in fee-based commissioned accounts as wrap assets. Wrap accounts are included in the composite; as 12/2014 – 17%, 12/2015 – 15%, 12/2016 – 15%, 12/2017 – 15%, 12/2018 – 13%, 12/2019 – 10%. Portfolio and composites will be revalued if external cash flow is greater than 10%. The annual composite dispersion is an asset-weighted standard deviation calculated when there are more than five accounts in the composite for the entire year. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request by contacting Tradition through their website at www.traditioncm.com. Effective Jan 2014, if an account has a 25% of total portfolio withdrawal/deposit, over a 2-month period, account will be taken out of the composite at the end of the month preceding the withdrawal / deposit and won't be put back in for 3 months. The All-Cap Advantage composite was originally created by Haven Capital Management on April 1, 1983. Haven Capital Management joined Tradition Asset Management in March 2009, the shaded area above reflects the composite levels at Haven Capital Management. Results for the full historical period are time weighted. From January 1, 1984 through December 31, 1992, composite results were a simple average; the Firm was not in compliance during this time period. Beginning January 2007 a non-fee-paying account is included in this composite: In 2007, 7.7%; in 2008, 95% of the composite is comprised of a non-fee-paying account. As of June 2009, no non-fee-paying accounts are in composite. Strategy assets is for supplemental purposes only. The assets include all accounts that are managed under the All-Cap Advantage strategy whether or not they qualify for the composite. On December 31, 2013 Tradition Asset consolidated variations of their All-Cap strategy into one composite. **Partial year from Oct 2000 to Dec 2000. On August 31, 2015, Candor Wealth Advisors merged into Tradition Asset Management.

Definition of terms

Alpha is a risk (beta adjusted) measurement. Officially, alpha measures the difference between a portfolio actual returns and what it might be expected to deliver based on its level of risk. High risk generally means higher reward. A positive alpha means the fund has beaten expectations. A negative alpha means that the manager failed to match performance with risk. If two managers had the same return, but one had a lower beta, that manager would have a higher alpha.

Beta represents the systematic risk of a portfolio and measures its sensitivity to a benchmark. A portfolio with a beta of one is considered risky as the benchmark would therefore provide expected returns equal to those of the market during both up and down periods. A portfolio with a beta of two would move approximately twice as much as the benchmark.

Multi-Statistic Quartile Ranking Bar - The Multiple Statistics Quartile Ranking graph is used to rank various performance and statistics of PSN managers, market indexes or your own self-entered products against a universe. The range of returns/ other modern portfolio characteristics in the universe are represented by floating bars. Each bar is broken up into 4 quartiles. The upper quartile represents the top 25% of the managers in the particular universe for the particular time period (you can choose up to eight time periods). The managers, indexes and portfolios are plotted relative to the floating bars.

The Sharpe Ratio, developed by Professor William F. Sharpe, is a measure of reward per unit of risk – the highest the Sharpe ratio, the better. It is a portfolio's excess return over the risk-free rate divided by the portfolio's standard deviation. The portfolio's excess return in its geometric mean return minus the geometric mean return of the risk-free investment (by default, T-bills).

Standard Deviation is a statistical measure of volatility; indicates the "risk" associated with a return series. The Fund vs. Universe graph measures a funds percentile rank for a given statistic relative to the chosen category.

The Up and Down Capture is a measure of how well a manager was able to replicate or improve on phases of positive benchmark returns, and how badly the manager was affected by phases of negative benchmark returns.

General Disclosures

Tradition Asset Management, LLC (“Tradition”) is an SEC (Securities and Exchange Commission) Registered Investment Adviser (RIA) and provides portfolio management and related services for a fee.

Investing in stocks, bonds, and other assets which present various forms of risk to investors could result in losses and positive returns are not guaranteed. Diversification only reduces risk of capital loss but does not eliminate this risk. Measures of expected return and/or expected risk are not forecasts of returns or risks but are only statistical definitions for modeling purposes based upon financial and statistical analyses. Past performance is no indication of future results, and all investments or assets could lose value in the future due to a variety of financial factors. Due to volatility exhibited in various markets, including but not limited to stocks, bonds and other forms of investable assets these markets may not perform in a similar manner in the future. Among risks which can affect value, financial assets are also exposed to potential inflation and liquidity risks. Investors may experience different results in any chosen investment strategy or portfolio depending on the time and placement of capital into any assets associated thereto. The performance of a specific individual client account may vary substantially from the performance results reflected above. This communication is solely for information purposes and not an offer to sell or solicitation of offers to buy any securities mentioned herein.

Tradition Asset Management, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Tradition has been independently verified for the periods October 17, 2000 through December 31, 2018. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm’s policies and procedures are designed to calculate and present performance in compliance with the GIPS standards through December 31, 2017. Verification does not ensure the accuracy of any specific composite presentation. A copy of the verification reports are available upon request.

In March 2009 and August 2015 respectively, Haven Capital Management LLC (“Haven”) and Candor Wealth Advisors LLC joined Tradition Capital Management LLC. Tradition Asset Management LLC is the successor of Tradition Capital Management LLC and effective April 30, 2019, is a wholly owned subsidiary of Luxon Financial LLC. Tradition Asset Management is the trade name used by Tradition Asset Management LLC.

Tradition's investment management annual base fee schedule as detailed in Form ADV Part 2 is as follows: 1.0% on the first \$5MM, 0.8% over \$5MM. Actual investment advisory fees incurred by clients may vary.

Please visit our website at www.traditioncm.com for all the firm’s disclosures and to request copies of the most recent Form ADV Part 2A and Privacy policy as well as Tradition’s policies for valuing portfolios, calculating performance, and preparing compliant presentations.
